

Elite Series Key Control

MX Electronic Key Systems

The KEYper® MX Electronic Key System provides a revolutionary method of key and asset management designed to fit the needs of all industries while providing the ultimate solution in accountability, analytics, security, and asset control. KEYper MX key systems can be customized to fit the needs of your organization ranging from 32 to 288 keys per cabinet, and can easily be expanded to more than 2,000 total keys. KEYper MX key systems can be easily wall-mounted or configured as a free-standing system. The system provides a complete audit trail of your keys and assets. You will always know who has your keys, when they took them, and why. The KEYper MX key system also offers a wide array of features and add-ons to meet your organization's needs.

- **Web-Based Administration**
- **Customized Reporting**
- **Email SMS/Alerts**
- **Digital Photo Capture**
- **Multiple Access Options (PIN, Biometric, Proximity Cards)**
- **And Much More**

Features And Add-Ons

Mobile Reservations

The KEYper GO mobile app provides the real-time status of all keys within your organization. With the touch of a button, you can select keys for immediate checkout, reserve them to be picked up later, or notify another user that you are looking for a key in their possession.

Lot Blocking

Use our Lot Blocking system to help identify vehicles that may be blocked by multiple vehicles. Also identify the exact lot location of any given vehicle.

DMS Integration

**DEALER
DOWNLOADS**

KEYper has partnered with Dealer Downloads, providing the ability to import your vehicles from most DMS Providers.

Label Printer

Use the KEYper Label Printer to print various labels for your vehicles and equipment. Incorporate a barcode onto the label and use KEYperSCAN to identify vehicles out on the lot.

Easily manage your keys
