

Key Management for Automotive Dealers

Efficient, effective and secure

Total solutions for managing keys, dealer plates, and every vehicle in your inventory!

We Understand Your Challenges

Have you ever had a vehicle stolen, and at what cost to your business?

If a key went missing, could you identify who last had it and when?

How much time and money does your business spend locating or replacing lost keys?

Are you lacking visibility over your inventory, and knowing the exact lot location of each vehicle?

Is the inefficient management of keys affecting your customers' car shopping experience?

KEYper Brings Better Security, Accountability and Efficiency to Your Dealership

Secure and manage access to vehicle keys

Gain control and visibility over every dealer plate

Easily take inventory of every car on your lot

Maintain an audit trail with detailed analytics

Electronic Key Management

KEYper MX Puts You in Control

What would a lost key or vehicle cost your business?

Storing hundreds of vehicle keys and holding sales agents accountable is a challenge that faces every dealership. KEYper MX delivers a proven solution to increase security and accountability, while offering more efficient key access and better visibility over your inventory.

MX electronic key systems provide a simple and effective solution for managing your entire key inventory. The system allows authorized staff to quickly gain access to vehicle keys, while maintaining an audit trail of every transaction, including who took the key, why and when.

16-gauge
steel cabinets

32-288 keys
per cabinet

2000+ keys
per networked system

Secure storage. Controlled access.

The MX system provides fast, automated access to keys for your sales staff, with no compromise to security. Using the intuitive touchscreen interface, quickly find a key by VIN, make, model, color and more.

- Keys can only be accessed by authorized staff via PIN, fingerprint or access card
- Intuitive touchscreen interface for fast and easy user transactions
- Quickly locate keys by VIN, stock number, year, make, model, interior or exterior color, and more
- System records every transaction, providing a detailed audit trail of all activity
- Require that users select Issue Reasons upon checkout, to capture more detailed information on key usage
- Should a desired key be already checked out by another user, see who has it and how to contact them
- Lot Blocking feature helps identify vehicles that may be blocked in, and allows the user to checkout all the keys needed to access it

With more secure and efficient key management processes, your staff is held accountable, and your business saves valuable time and money.

LOCK-IN Dealer Plate Extension

Total Control and Visibility over Dealer Plates

Is your sales process hitting a roadblock due to missing dealer plates?

The KEYper Dealer Plate Extension Cabinet provides a simple way to add **LOCK-IN control over dealer plates to your existing MX system**. Whether your plates are pooled or assigned to specific sales personnel, they can be quickly checked out in the same transaction as vehicle keys for a more secure and efficient process.

How it works

- Each dealer plate is securely attached and locked in place using our metal Lock-In iFob
- The cabinet enables strict control over access to each individual plate
- Authorized users can select to check out a plate in the same transaction as a vehicle key, offering a fast and seamless experience
- Enjoy the same administrative features you use on your MX system, including checkout time limits, notifications, item reservations and more!

Can be added to any MX system

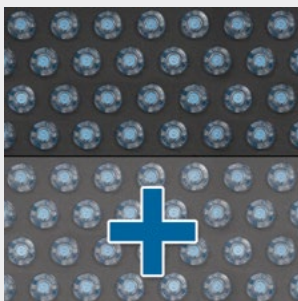

Manage 8-32 plates per cabinet

Every plate is locked into the cabinet

Having better control and faster access to dealer plates is great for your sales staff and your customers.

MX Features and Options

Modular panel design provides increased capacity as needed

Flexible authentication options for security and convenience

Available high-security lock for added security after business hours

Label printer for tagging keys or managing inventory with KEYper SCAN

Web-based Administration

Powerful Tools to Master Your Inventory

How much does your business lose to reduced productivity, visibility and control?

KEYper solutions solve the everyday problems that affect your bottom line. When you create better processes around securing and managing your keys and dealer plates, your focus can be directed to what matters most – sales and service.

- A lack in staff accountability poses an increased risk for **loss, theft and misuse**
- The average dealership loses **\$5,000 per month** on key replacement
- Not having keys and dealer plates readily accessible for demos results in a **loss in productivity and sales**, and affects customer satisfaction
- A lack in visibility over key access means it could take **days or weeks to know that a key is missing**

Our web-based administration software lets you manage and monitor system activity from anywhere.

See realtime system activity, including which keys are out of the system, who accessed them, and for what reason. Access a complete history of every transaction, and run custom reports on activity for your entire vehicle inventory.

Reduce risk

Improve visibility

Increase efficiency

KEYper puts you in control, even when you're not there

Beyond the security and convenience of MX key cabinets, there are numerous benefits to be gained from our web-based administration software.

- Manage all keys, dealer plates and users from any computer
- Set curfews to determine how long keys are allowed to be out of the system
- Receive email or SMS notifications of important events, such as an overdue key or a cabinet door being left open
- Capture vehicle lot location upon key return, providing better efficiency for the next user to access that key
- Capture Issue Reasons for each checkout to gain better visibility over vehicle usage
- Receive customized reports to monitor important inventory activity, or confirm that all keys have been returned at close of business

Enhance your MX experience with DMS integrations

Enhance Your MX Experience

Protect your assets with KEYper Command Center

When you can't be there in person, KEYper can! Command Center allows KEYper to remotely monitor your system's connectivity, data, memory, software and warranty. If your system goes off line, your database fails to backup or your warranty nears expiration, our customer care team will be alerted and will reach out to your team.

- Analytics Dashboard
- Remote Monitoring
- Database Backup
- Automatic Software Updates

Manage your inventory in a few simple steps!

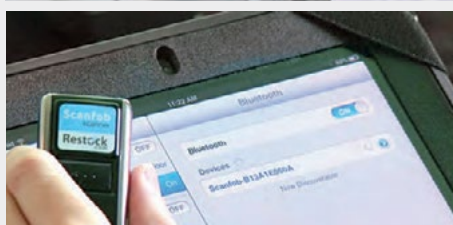

KEYper SCAN is a cost-effective inventory management system that works seamlessly with MX key systems.

Easy to use | Easy to implement | Saves time | Low cost of ownership

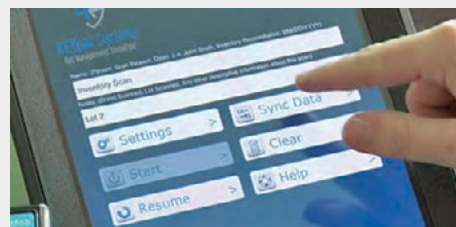

Step 1: Label vehicles with weatherproof bar code

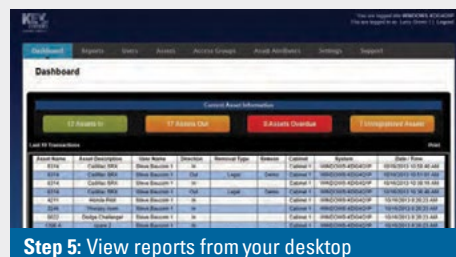

Step 2: Download real-time vehicle data to iPad

Step 3: Scan vehicles

Step 4: Sync data back to key system

Step 5: View reports from your desktop

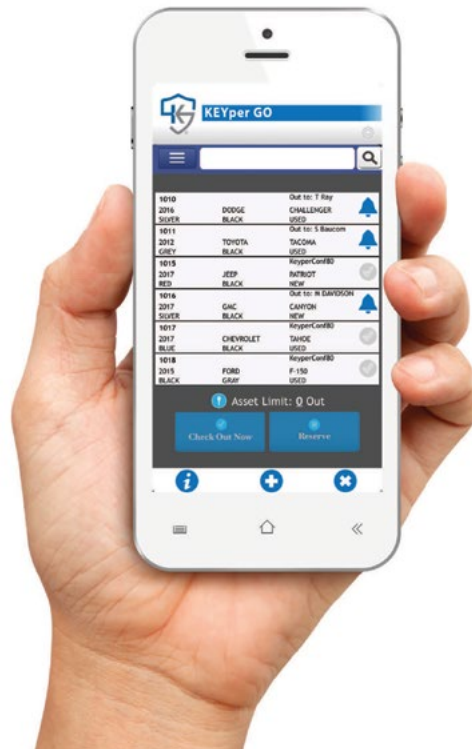

Your MX System "On the GO"

Easily manage your keys from your phone

Using the KEYper GO mobile app, you can see the real-time status of all keys and assets throughout your entire organization. Then with the simple touch of a button, you can select keys for immediate check out, or you can reserve them to be picked up at a later time.

If the key you are looking for is already checked out to another co-worker, KEYper Go can notify them via SMS message that you are looking for that key. With less time spent checking out keys, you'll have more time to focus on your customers and generating revenue for your business!

- Key Checkout
- Key Reservation
- Real-time Key Status
- SMS Notifications
- Lot Location
- Customizable Search
- Monitor Asset Limits
